Alfatronix authorised distributor in Poland

Dear Sir/Madam,

Alfatronix has been working with Altran for many years in the Polish market and have had great success due to their hard work and dedication. We wish to continue to develop our relationships in this market by offering unrivalled local and technical support. Alfatronix is delighted to inform you that Altran will remain as our preferred partner in the local market. Both Alfatronix and Altran will continue to invest engineering time and sales support to ensure that all your voltage conversion requirements are adequately serviced.

Alfatronix produce a range 24Vdc – 12Vdc voltage converters and power supplies which can be used for the installation of PMR, Tetra and GSM equipment onto trucks, buses, forestry, construction and off road vehicles. Additionally, Alfatronix produce mains voltage power supplies for radio base station systems, repeater stations etc. For further information, please visit www.alfatronix.ltd.uk

Kind Regards,

Keith Reilly
Managing Director
